

ISE member dues system

Proposal voted at ISE General Assembly 31 January 2020

1. Introduction

The *effective income* is the net income of an organisation reduced by conference expenses. In other words, the profit (or loss) from conferences activities (after tax) shall be considered, as part of the effective income but not the overall conference income.

The member dues system shall be operative from 2020 on and shall be valid ad infinitum unless recalled by the ISE General Assembly or superseded by the statutes of ISE.

2. Fee Bands

The *annual dues* depends on the effective income of an organisation according to the following table:

	effective income	annual dues
Band 1	up to 50'000 Euro	500 Euro
Band 2	from 50'000 to 100'000 Euro	1'000 Euro
Band 3	from 100'000 to 500'000 Euro	3'000 Euro
Band 4	above 500'000 Euro	6'000 Euro

3. Incoming members and exceptions

3.1. For organisations that join ISE during the year, the dues in the first year shall be calculated pro-ratio starting with the next quarter following their accession to ISE.

3.2. The general assembly may grant exceptions for organisations whose effective income lies in Band 3. Reasons for requesting an exception must be submitted by the applicant in writing.
